Qualifications

- **B. Tech : Institute of Technical Education and Research, Siksha 'O' Anushndhan**

Professional Experience

I am an ambitious student of electronics and communication engineering and actively immerse myself in the fields of embedded systems, deep learning, and the internet of things. I have a strong understanding of these cutting-edge technologies thanks to my academic background, which I have easily incorporated into my practical expertise. I have a background in Salesforce development and have developed a thorough understanding of a variety of components, enabling me to maximize their use.

My academic career has developed a comprehensive skill set for me that combines technical proficiency with analytical powers. Beyond my technical abilities, my unwavering passion for learning keeps me abreast of emerging trends and innovations.

Skills: Salesforce Apex, C, DSA, MS Excel, Poster Designing

Soft Skills: Customer Service, Excellent Communication Skills

Technical Skills: Salesforce Aura, LWC, IoT, Embedded System, Machine Learning, Python

Key Engagements

- Worked in implementing a School admission management application that allows school administrators to manage all the students and Teachers. Also worked with aura and LWC and made several lightning components
- Have good experience in process automation and Apex programming. Also have knowledge on SOSL, SOQL and DML queries.
- Developed several projects using lightning web component such as BMI Calculator, Weather App, Currency Converter, My Portfolio etc.
- Work in implementing Plant Disease Detection using Deep Learning Algorithm i.e., Convolutional Neural Network.
